In 2020, the South Kazakhstan Medical Academy, within the framework of the Erasmus + program, won a grant for the project “Professionalization of Bachelor’s and master’s degrees in strategic management and risk management in healthcare within the framework of open and distance learning in Russia, Kazakhstan and Azerbaijan – LMQS”, where the grant applicant is the university Western Attica

The goal of the project

is to contribute to the development of health security and quality management of health care services, as well as the implementation of policies and strategic principles in Russia, Kazakhstan and Azerbaijan by mobilizing personnel and training them in the practical application of necessary actions by offering higher education programs (academic programs) and professional training programs capable of transferring the skills needed by medical structures / companies.

The objectives of the project

are to improve the quality of higher education and increase its relevance for the labor market and society. To increase the level of competencies and skills in higher education institutions by developing new and innovative educational programs.

- Creation and maintenance of a well-structured management system, with the active participation of university teachers;
- Progress towards computerization of an integrated and interactive risk management scheme in healthcare;
- Development of a patient-oriented model - respect for patients' rights - through improving the quality of listening and informing users;
- Development of a culture of quality, communication and continuous learning;

The project is structural, the consortium includes 12 universities of Kazakhstan, Russia and Azerbaijan. The countries of the program are represented by universities in Greece, France and Romania. The partners in the consortium are the 7th City Hospital of Almaty, the Department of Nuclear Medicine of the National Cancer Center of Azerbaijan, the Center for Continuing Education and Advanced Training of Romania, the Ministry of Education and Science and the Ministry of Health of the Republic of Kazakhstan.

This project is innovative thanks to its results-oriented approach, bringing together different organizations (public, private, ministries, universities, companies) to develop and implement new training programs expected by healthcare companies in accordance with the EQF and the Bologna Process. It is also the creation of professional Bachelor's and Master's programs, offering modules for students and employees, available on the Internet. The skills-based needs analysis approach methodology will ensure that the training offered is perfectly aligned with the existing and expected work in the companies.

Implementation
years: 2021-2024.

The composition of the working group of the project of JSC "SKMA" P7
